

Famous for Cushioning

Protective Air Bubble Film

Bubble film is one of the most recognised protective packaging products on the market today. Air bubble film offers an economical, effective solution for void filling, interleaving, wrapping and cushioning.

Our range of excellent quality, small and large bubble products include co-extruded films, laminations and converted products.

Jiffy® Bubble Film

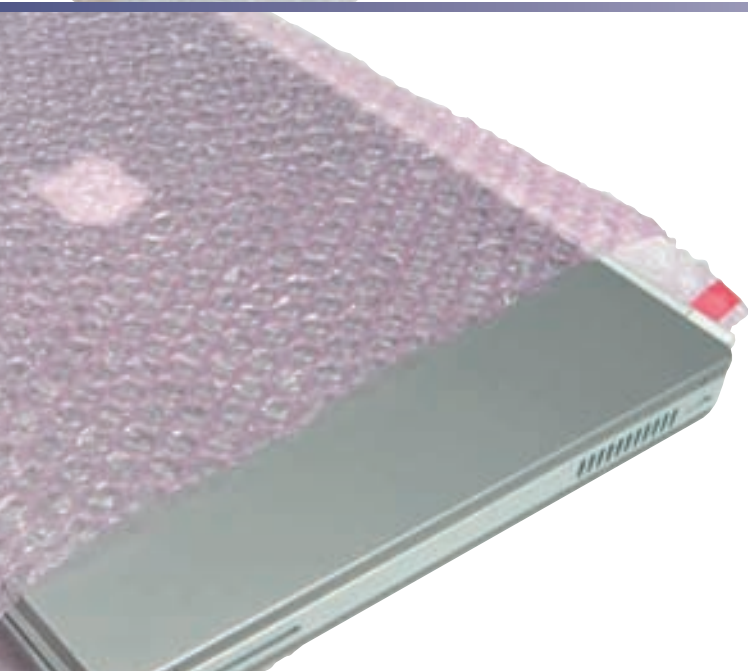

Although it may look like an ordinary material, we manufacture using advanced technology which incorporates a layer of barrier film.

The process seals each air pocket, reducing air escape, giving longer lasting protection and performance. Suitable for both heavy and lightweight items on longer storage or journey cycles.

Available in large and small bubble with slit and perforation options to suit your requirements and can be extruded in widths up to 2500mm.

Available in rolls, pouches and sheets.

Anti-static and laminated products are also available.

Converted Bubble Products

Jiffy have extensive conversion facilities and years of experience. We are able to convert our bubble products and bubble laminations into a variety of value added products.

Our converted product options offer ease of use, portion control and tailor made protection suitable for a number of applications and industries.

Our range of stock bubble pouches or bespoke converted products, including sheets and sleeves, can be used for retail, commercial and industrial applications.

Jiffy offers a quick turn round, efficient service and competitive pricing.
