

YOUR PREFERRED DIY PARTNER

WE CREATE YOUR PREFERRED DIY PARTNER

Abriso Jiffy offers an extensive range of recyclable protective packaging materials and insulation products. We guarantee flexibility and reliable delivery through our 19 branches across Europe. This allows local & low-quantity delivery, limiting our and your company's environmental footprint.

PRIVATE LABEL

We know how important it is to connect your name to a product. That is why we can offer every product as a **private label**. We can customize the product on the label, the packaging or even on the product itself, just as you wish.

QUALITY

As a leading company in the field of non-cross-linked foams and bubble solutions, we value quality more than anything else, which is why we have our own **Centre of Excellence**. This enables us to submit the necessary certificates for our products.

We hold certifications including:

WE SUSTAIN SUSTAINABLE & RESPONSIBLE

Recycle

All of our products are 100% recyclable.

Re-use

100% of our production waste is reused.

Reduce

Closed-loop processes reduce virgin material usage.

Rethink

Developing new technologies to limit any environmental impact.

THE SUSTAINABLE ADVANTAGES

1. Local Presence

With 19 branches across Europe, we are always close to you, reducing the carbon footprint and ensuring a short transport chain.

2. Eco-Friendly Products

Our products are made from recycled content and are fully recyclable, supporting a circular economy.

3. Cost-Effective

By buying locally within Europe, you avoid extra taxes and tariffs on imports, saving you money.

4. Sustainable Sourcing

Our European production minimizes environmental impact, offering a greener alternative to overseas manufacturing.

WE PROTECT IN 3 WAYS

Proper protection of your goods prevents them from breaking and getting scratched, shields them from dirt & water, keeps them fresh for longer, or even insulates them against heat or cold. We even protect your ears with our acoustic insulation products.

Damage

In general, 3 to 5% of the European citizens are moving intra-country per year. That is about 14 million potential clients of bubble wrap and polyethylene (PE) foam to protect their valuable objects for worry-free moving.

Heat / Cold

Hot topic, cold reality. People are always looking for a way to save money. Use Abriso Jiffy's easy-to-install insulation products and reduce the impact on your bills and on Mother Nature.

Radiator foils, draught stoppers, XPS building boards, insulation tubes and sealing tubes, all items who saves money because of their insulating value!

Noise

Living closer together often means more noise, but it doesn't have to. With AJ's noise-insulating underlays, you will enjoy a quieter living environment, essential for improving the comfort in your home.

BUBBLE WRAP

PROTECTION OF YOUR BELOVED FRAGILE AND VALUABLE GOODS

Our **AstroBubble® Ocean Green®** is designed to wrap your products in a soft, shock-absorbent cocoon, perfect to protect them from tough conditions during transport and storage.

This versatile PE bubble wrap has a wide range of applications. From protecting fragile glassware and electronics to wrapping works of art and furniture. Our PE bubble wrap adapts easily to any shape and size, and is also available in a practical dispenser box with a tear-off perforation.

For DIY, we also offer short rolls of lengths between 3 m and 30 m.

Ocean Green® bubble wrap, recognisable by its green colour, is made from up to 100% recycled material and is 100% recyclable. Ocean Green® bubble wrap is a key part of Abriso Jiffy's sustainability story.

FOAM

PROTECTION OF YOUR BELOVED FRAGILE AND VALUABLE GOODS

Our foam, **AstroFoam®**, is an extruded non-crosslinked polyethylene (PE) foam, available in different densities, thicknesses and dimensions. Because of its closed cell structure, giving high resistance to scratches and impacts, our foam is a perfect packaging solution for surfaces requiring special protection.

PROFILES

PROTECTION OF YOUR BELOVED FRAGILE AND VALUABLE GOODS

Our extruded PE profiles, **AbriProfile® Ocean Green®**, provide ideal protection for your valuable products.

Designed to protect against impacts and scratches, these profiles ensure that your products remain in perfect condition. AbriProfile® Ocean Green® profiles offer versatile solutions tailored to your specific needs.

The AbriProfile® Ocean Green® is the reliable corner and surface protection for glass, wood, plastic, metal,... They provide firm grip on a variety of products, from furniture to bicycle frames, and are available in customisable sizes and thicknesses to meet specific needs.

WE PROTECT AGAINST **HEAT** / **COLD**

RADIATOR FOIL

BOOST YOUR ENERGY EFFICIENCY

Radiator foil is made of PE bubble wrap or PE foam laminated with a metalized foil.

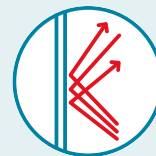

The purpose is to improve energy efficiency and reduce heating costs. The foil reflects heat from the radiator back into the room instead of allowing it to be absorbed by the wall. This makes the radiator and heating in general more effective. Radiator foil helps save on energy bills and is easy to install.

Some people even use the radiator foil to insulate their garage door.

DRAUGHT STOPPER

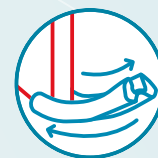

DON'T LET YOUR ENERGY BLOW AWAY

Looking for an easy-to-fit instant draught stopper to prevent unpleasant heat loss? Our 100% recyclable draught stopper, made 100% of PE, is the solution.

By blocking incoming draughts, draught stoppers help maintain a constant indoor temperature, reducing the need for heating or cooling. This leads to more efficient energy use, lower energy bills and more cozy moments during winter times.

WHY CHOOSE DRAUGHT STOPPER

Easy to install
and detachable

Efficient
energy saving

Cuttable

& reusable

WE PROTECT AGAINST **HEAT / COLD**

XPS

DURABLE, VERSATILE AND CUSTOMIZABLE INSULATION

Because of its moisture resistance and long-term durability, our extruded polystyrene (XPS) boards, **Styrisol®**, are the perfect thermal insulation product for roofs, floors, basements, swimming pools and much more.

Styrisol® is available in different densities, sizes, surface textures and edge finishes to perfectly suit any project.

Styrisol® can be customized with your branded label on the packaging.

Long lifetime

INSULATION TUBES

SMART INSULATION, BIG SAVINGS

You will find these full PE thermal pipes in almost every home because of their insulating, fire-retardant and moisture-resistant properties.

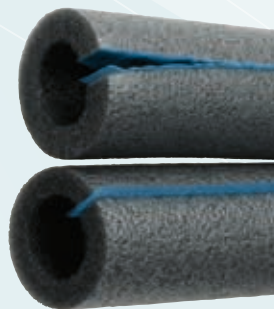

Insulating your hot water pipes is a simple and effective way to improve energy efficiency and reduce costs. It minimises heat loss and ensures a more constant water temperature. But it also protects water pipes from freezing temperatures in winter.

With insulation pipes, it's a small adjustment to your home, but a big saving on your energy bills.

Did you also know that these insulation pipes isolate the sound of ticking pipes?

 **Your Brand**

WHY CHOOSE INSULATION TUBES

Easy to install

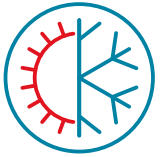

Excellent insulation qualities

100% recyclable

Corrosion resistant (exterior)

WE PROTECT AGAINST **HEAT** / **COLD**

SEALING TUBES

SEAL WITH CONFIDENCE

AbriFill, our sealing tube, is a round profile seal made of closed-cell polyethylene (PE) foam that prevents draughts and heat loss. It serves as reliable filling of building joints that are easily filled afterwards with spray sealants. AbriFill® is compatible with all standard sealing materials.

AbriFill is crucial for effective and efficient joint sealing, especially for deep cracks and expansion joints. They provide structural support, ensure the correct depth of the sealant layer and allow the joint to move freely without hindering the performance of the sealant. AbriFill saves on unnecessary use of too many flowing fillers.

20 mm	25 mm	30 mm	40 mm	50 mm

WHY CHOOSE SEALING TUBES

High flexibility

Available in different Ø

Does not absorb water

Very resistant to chemicals

FLOORING UNDERLAY

OUR UNDERLAYS ARE NOISE-REDUCING AND COMFORT-INDUCING

The choice of flooring underlays, often underestimated, is crucial to the perceived comfort of your home. Abriso Jiffy underlays shine in sound insulation and create an acoustic barrier between your floor and the screed. Most Abriso Jiffy flooring underlays are ideal for use with underfloor heating and cooling.

The underlays are used in combination with LVT floors, laminate and even floating parquet.

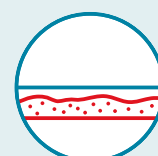

WHY CHOOSE FLOORING UNDERLAY

Noise insulation

Easy to install

Levelling unevenness

100% recyclable

WE PROTECT AGAINST **NOISE**

SIDE STRIPS

PREVENTING COLD BRIDGES AND FLOOR CRACKS

Side strips are placed at the edges of a room or building element to avoid cold bridges (thermal insulation) or sound bridges (acoustic insulation). Side strips can absorb the expansion and/or contraction of floors. They can also be perfectly used as expansion joints of the screed. This way, the risk of cracks or fissures in a floor is incredibly small.

The correct installation of acoustic side strips is essential for the dB rating of your building project. Our side strips are crucial in reducing overall impact sound.

At Abris Jiffy, we are proud of our high-quality acoustic side strips. Made of extruded closed-cell polyethylene (PE) foam, they are also moisture-resistant, making them ideal for a variety of applications.

Product colour can be customized

WHY CHOOSE SIDE STRIPS

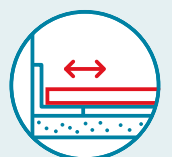

Easy to install

Reduces contact sound

100% recyclable

Absorbs floor expansions

CUSTOM PACKAGING AND INSULATION SOLUTIONS EXPERT DIY PRODUCTS TAILORED TO YOUR NEEDS

Abriso Jiffy aims to exceed your expectations with our DIY range. With more than 50 years of expertise in extruded polyethylene (PE), polypropylene (PP) and polystyrene (XPS), we offer the widest range of protective packaging and insulation products in Europe. Our R&D and commercial teams are ready to customise products to your exact needs.

We specialise in do-it-yourself products and can create customised solutions, from different strip sizes to customised colours and branding. Our motto, 'We can make it for you!', reflects our commitment to flexibility and customer satisfaction.

But sometimes it is even easier and we can link our product to your brand name through a [Private Label](#). In short, link quality with quality.
