**ABRISO**    
WE CREATE. WE SUSTAIN. WE PROTECT.

# WE CREATE WE SUSTAIN WE PROTECT

---

At Abriso Jiffy, we've spent more than 50 years creating, sustaining and protecting. For our customers. For our team. For our planet.

As supplier of the most diverse range of protective packaging and insulation products in Europe, we are on a mission to show that great service, impeccable quality, and market-leading sustainability is as achievable in today's world as it was when we started.

**WE CREATE. WE SUSTAIN. WE PROTECT.**

[abrisojiffy.com](http://abrisojiffy.com)

# YOUR PROTECTIVE PACKAGING SOLUTIONS

Our packaging solutions are not just about protecting goods; they are everywhere, in almost every industry, helping companies protect and even develop their products. From electronics to entertainment, food and beverages to cars and much more - our products are there. It is surprising how important we are to the success of so many industries.

Whether it's preventing damage during transport, maintaining freshness or even contributing to the development of new products, we play a vital role. Our commitment to sustainability also ensures that we not only protect, but also minimise our impact on the environment, contributing to a greener, more responsible future in all sectors.

Check out the industries where our products can be found:

## Automotive

Our packaging ensures that delicate automotive components, from windows to electronic systems, are protected from damage during transport and storage, maintaining their integrity and functionality.

## E-commerce

We provide e-commerce companies with reliable and durable packaging, which does not only protect products from damage, but also ensure flawless delivery.

## Electronics

Our specialised packaging for electronics prevents static discharge and provides cushioning to protect sensitive devices from shock and vibration, ensuring they reach customers in optimal condition.

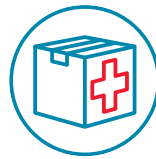

## Food

For the food industry, our packaging solutions maintain freshness, prolong shelf life and protect against temperature fluctuations.

## Furniture & Moving

Our extensive product range offers a wide range of protective solutions, including bubble wrap & PE foam laminated with additional protective layers. Whether you need rolls or sheets, you will be right with us. We want to simplify your moving experience by making sure you can pack and protect belongings safely.

## Medical

We understand the importance of protecting medical supplies. Our packaging meets strict standards and ensures that medical products remain sterile and intact.

## Sports & Leisure

Due to the versatility of PE foam, you will also find our products in sports and leisure application, such as swimming noodles, yoga mats, bike protection, ...

Across all these sectors, our goal remains consistent: to protect the goods you care about with innovative, sustainable packaging solutions that contribute to a greener, more assured future.

# AT ABRISO JIFFY WE PRACTICE WHAT WE PREACH

## OCEAN GREEN® & RENEW BRANDS

At Abriso Jiffy we believe in facts rather than making unachievable future commitments. Therefore our claim of 80% recycled content in our RENEW products means that we use minimum 80% and not up to 80% recycled content and for Ocean Green® 70% recycled (bubble) and 100% (profiles) content.

Furthermore, our recycling process is checked by a third party auditor to be in line with the European recycling directive.

~~Up to 80%~~  
↓  
**Abriso Jiffy  
as from 80%**

## CERTIFIED

All production sites  
Polycert certified in 2024

Recyclclass certified in selected plants  
for technical foams

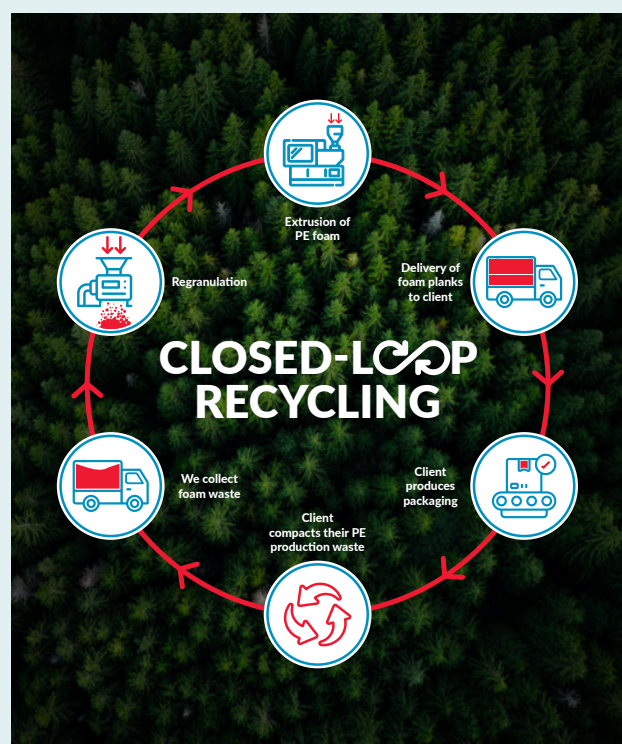

## PARTNERSHIP TO ACHIEVE CLOSED LOOP RECYCLING

In our commitment to create a circular economy, we are revolutionizing the world of technical foams.

Our latest achievements, RENEW Polylam® and RENEW Nopaplank®, represent groundbreaking milestones toward a circular economy.

Together with our clients and their end customers we have set up a waste collection program.

**100% use  
of internal  
waste streams**  
  
**Recycling PCR & PIR  
from external parties  
to re-use  
in our products**

# I'AM BIO BASED 100% ORGANIC POLYETHYLENE

---

At Abriso-Jiffy, we offer the option to manufacture all our polyethylene foam and bubble products using bio-based polyethylene derived from green ethanol sourced from sugar cane. Chemically identical to conventional polyethylene, our bio-based products maintain the same high quality and performance.

By utilizing residues from this natural raw material, we contribute to a circular economy and help reduce the carbon footprint of our products.

# CHOOSING THE **RIGHT** PROTECTIVE PACKAGING MATERIAL

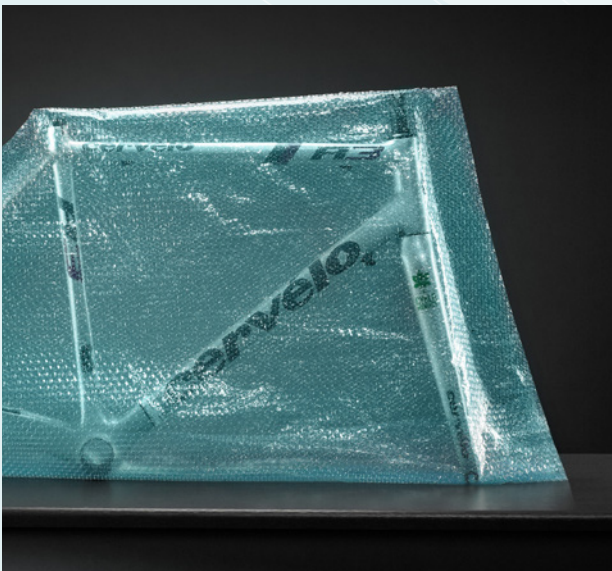

---

Both **bubble wrap** and **foam** packaging are excellent choices for protective packaging, each with their own properties that make them better suited for different applications.

## WHEN TO CHOOSE BUBBLE WRAP

Bubble wrap is the great all-round protector. With its **air cushioning**, it provides excellent protection for both light and heavy fragile items. It comes in different dimensions to accommodate a wide range of sizes and weights. Bubble wrap is known as the perfect shock-absorption product to protect your goods.

**Perfect for furniture, e-commerce products and large pieces of artwork,...**

## WHEN TO CHOOSE FOAM

Foam packaging is thinner and lighter than bubble wrap. It is ideal for shipping delicate items with premium polished surfaces because its smooth texture **prevents marks and scratches on products**. Foam packaging is perfect for ceramics, large electronic equipment, furniture and highly polished parts such as alloy wheels.

**Perfect for glassware, ceramics, electronics, etc..**

---

## CONCLUSION

Bubble wrap and foam sheets both have their advantages and are excellent choices for protecting your items during moving or shipping. Consider the specific needs of your belongings and the benefits of each material to make sure you choose the right one.

## DID YOU KNOW?

We have laminated products combining the best of both worlds.

# BUBBLE WRAP

## LOVE IS IN THE AIR

We love to protect your goods. Our PE bubble wrap, **AstroBubble®** is designed to wrap your products in a soft, shock-absorbent cocoon. Like this we are perfectly protecting them from the tough conditions during transport and storage.

This versatile bubble wrap has a wide range of applications since it adapts easily to any shape and size.

### ADVANTAGES

- **Shock Protection:** The bubbled structure provides excellent cushioning and shock absorption, making it ideal for protecting fragile items during shipping.
- **Flexibility:** Bubble wrap is highly flexible and adapts well to different shapes, increasing its versatility.
- **Space Efficiency:** Creates a buffer zone between the packed object and external impacts.
- **Common Usage:** Widely used in packaging for online deliveries and suitable for various customers.

### WHEN TO CHOOSE BUBBLE WRAP

- For shipping fragile items requiring excellent shock protection.
- When packaging needs to be adaptable to different shapes.
- For general consumer packaging and e-commerce deliveries.
- Perfect for interleaving, wrapping and surface protection.

## GENERAL SPECIFICATIONS

- **Thickness:** from 30 µm up to 250 µm
- **Width:** from 10 cm up to 300 cm
- **Length:** from 3 m up to 400 m depending on the diameter of the bubble

BUBBLE					
HEIGHT (MM)	2	3	8	10	12
DIAMETER (MM)	10	10	18	25	30

## PROPERTIES

- Practical and easy to use
- Dust-free
- Chemically inert
- 100% recyclable
- Non-toxic & odourless
- Mould and moisture resistant

### ASTROSOFT®

**AstroSoft®** is a product range where foam is laminated with bubble. This gives the advantages of both materials.

## GO GREEN!

We strive to maximise the use of recycled content. That is why we are strongly committed to recycling and reusing raw materials. By investing strongly in our R&D, we always stay ahead in the development and innovation of new sustainable products.

Ocean Green® (OG) bubble, recognisable by its green colour, is made from 70% recycled material and is 100% recyclable. Ocean Green® bubble is a key part of Abriso Jiffy's sustainability story.

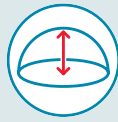

## CHOOSE YOUR BUBBLE

### Bubble diameter

Smaller bubbles are mostly used for wrapping items, bigger bubbles have a better shock-absorption and are often used for cushioning light fragile products.

### Bubble height

Crucial for providing cushioning and shock absorption, helping to protect items during shipping and handling.

### Micronage

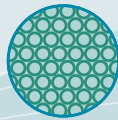

Affects its durability, puncture resistance, and tensile strength.

## CHOOSE YOUR OPTIONS

### Lamination

Protects heavy, fragile products or products with sharp edges/corners. Different laminations are possible such as PP fleece, PE foam (ideal to protect your delicate products against being scratched), LDPE foil, Kraftpaper, PP, aluminium, ...

### Ocean Green®

Our sustainability solution, Better for nature, same quality!

### Colour

Serves both practical and creative purposes.

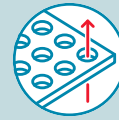

### Antiflam

Designed to meet specific fire safety standards.

### Antistatic

Protection from electrostatic discharge.

### Macro perforation

Water-permeable or condensable during transport or cold storage.

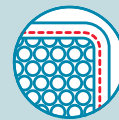

### Tear-off perforation

Makes it easier to handle for some applications. Also called Sheets-on-roll.

### Food proof

Adds the assurance that it is safe for food use.

### Stitched bubble

Stitched covers are used as durable packaging for high-quality products, such as furniture, bikes, car parts, ...

## CHOOSE YOUR SIZE (WIDTH & LENGTH)

### Rolls & Short Rolls

The width varies from 10 cm to 300 cm. The length of rolls are from 3 m to 400 m and from 3 m to 30 m for short rolls.

### Sheets & Sheets-on-roll

Are available in different custom made sizes. Sheets-on-roll are rolls with a tear-off perforation at the preferred length.

### Bags & Bags-on-roll

Our bags can be made in different sizes and qualities, with or without flap. Flaps can be equipped with a sealing tape (tape also available in anti-static quality). Bags-on-roll are bags connected with a tear-off perforation for easy handling.

### Bubble dispenser

Designed to efficiently store, dispense, and tear-off bubble wrap, making it easier to handle and use.

### Die-cut

Die-cutting makes it possible to deliver you a tailor-made shape.

# BUBBLE LAMINATES

To guarantee an even better protection, our bubble rolls can be laminated. All our laminates share the same important properties.

## IMPORTANT PROPERTIES

### Tear resistance

### Shock absorption

Apart from tear resistance and shock absorption, our laminates can also offer the following, unique properties.

## UNIQUE PROPERTIES

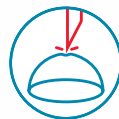

### Thermal insulation

- **Proposed laminate:** Metalized foil
- **Options:** PET/PE/PP/ALU
- **Explanation:** The metalized layer ensures the protection of your goods against temperature fluctuations.

### Privacy

- **Proposed laminate:** Kraft Paper
- **Explanation:** Kraft Paper guarantees the privacy of your shipment, as it cannot be seen through. Furthermore, you can write or draw on the paper, avoiding additional use of labels.

### Puncture resistance

- **Proposed laminate:** HDPE/LDPE
- **Explanation:** The additional layer ensures an extra toughness of the bubble, which optimally prevents puncturing.

### Scratch resistance

- **Proposed laminate:** Foam / PP non-woven
- **Explanation:** An extra soft layer of foam or PP non-woven avoids scratches on products with delicate surfaces.

### Adhesiveness

- **Proposed laminate:** Non-permanent adhesive foil
- **Explanation:** The non-permanent adhesive foil makes it possible to stick your bubble to different surfaces, ensuring that it stays in the same place during your transport.

FOAM

PROFILES

TECHNICAL FOAM

MAILERS

COLD PACKAGING

# FOAM THIS IS FOAM-TASTIC

**AstroFoam®** is an extruded polyethylene (PE) foam, available in different densities, thicknesses and sizes. Its closed cell structure guarantees high resistance to scratches and impacts.

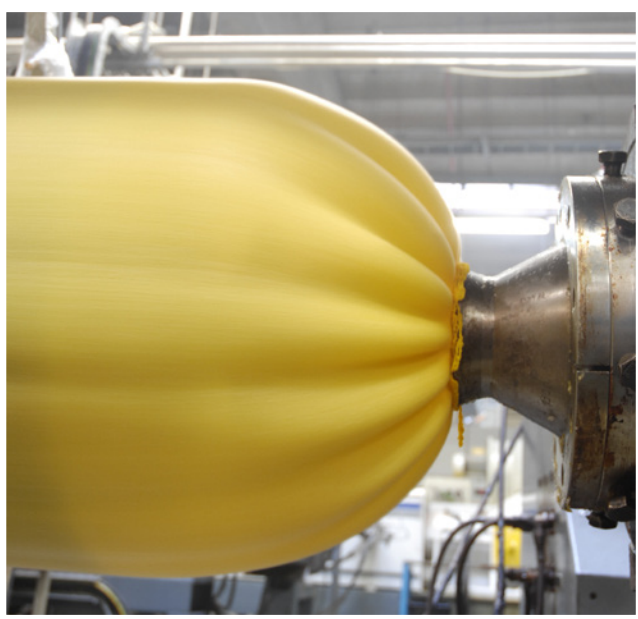

## ADVANTAGES

- **Scratch Protection:** Soft and non-abrasive, foam is ideal for protecting items from scratches.
- **Weight Bearing:** Capable of withstanding significant weight without losing its protective qualities.
- **Uniform Thickness:** Provides consistent protection across its surface.
- **Industrial Use:** Commonly used for industrial packaging, including automotive parts, electronics, ...

## WHEN TO CHOOSE FOAM

- For protecting items from scratches, moisture, or minor damage.
- Ideal for protection of electronics and small fragile products.
- Wrapping and protecting heavy and angular objects.
- When consistent protection across the entire surface is required.

## GENERAL SPECIFICATIONS

### ASTROFOAM® ROLLS

- **Thickness:** from 0,80 mm up to 20 mm
- **Width:** from 6 cm up to 250 cm
- **Length:** from 5 m up to 1150 m
- **Density:** up to 70 kg/m<sup>3</sup>

### ASTROFOAM® SHEETS

- **Thickness:** from 0,80 mm up to 20 mm
- **Width:** from 6 cm up to 250 cm
- **Length:** from 4 cm up to 1000 cm
- **Density:** up to 70 kg/m<sup>3</sup>

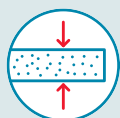

## PROPERTIES

- Non-toxic & odourless
- 100% recyclable
- Mould and moisture resistant
- Excellent heat and sound insulation
- Dust-free
- Chemically inert
- HCFC-free

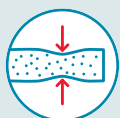

## CHOOSE YOUR FOAM

### Foam thickness

Thicker PE foam provides better impact absorption, thinner PE foam is more frequent used for cushioning, wrapping and interleaving.

### Density

High-density PE foam resists compression more effectively, maintaining its shape and protective properties under pressure. The lower the density, the greater flexibility and softness of the foam.

## CHOOSE YOUR OPTIONS

### Lamination

Protects delicate products and products with sharp edges. Different laminations are possible such as HDPE, metallized PET, ...

### Colour

Serves both practical and creative purposes.

### Antiflam

Designed to meet specific fire safety standards.

### Antistatic

Protection from electrostatic discharge.

### Macro perforation

Water-permeable or condensable during transport or cold storage.

### Tear-off perforation

Makes it easier to handle for some applications. Also called sheets on roll.

### Food proof

Adds the assurance that it is safe for food use.

## CHOOSE YOUR SIZE (WIDTH & LENGTH)

### Rolls & Short Rolls

The width varies from 10 cm to 300 cm. The length of rolls are from 5 m to 1.150 m and from 5 m to 30 m for short rolls.

### Sheets & Sheets-on-roll

Are available in different custom made sizes. Sheets-on-roll are rolls with a tear-off perforation at the preferred length.

### Bags & Bags-on-roll

Our bags can be made in different sizes and qualities, with or without flap. Flaps can be equipped with a sealing tape (tape also available in anti-static quality). Bags-on-roll are bags connected with a tear-off perforation for easy handling.

### Foam dispenser

Designed to efficiently store, dispense, and tear-off foam, making it easier to handle and use.

### Die-cut

Die-cutting makes it possible to deliver you a tailor-made shape.

# NETFOAM

## THE FLEXIBLE PROTECTION

With Netfoam, AbrisoJiffy offers the ideal solution for protecting glasses, bottles, vegetables, fruit and other fragile goods during transport and moving.

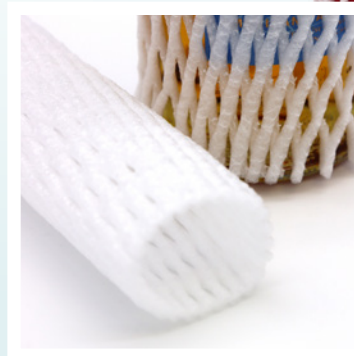

### SAFETY AND FLEXIBILITY IN ONE

Netfoam is made of strong polyethylene (PE) foam, which ensures optimal protection against shocks, impacts and scratches. Thanks to its stretchable structure, it effortlessly adapts to the shape of any object, keeping your goods safely and securely packed.

### VERSATILE APPLICABLE

- Protects glasses, bottles and other fragile material during moving or shipping.
- Ideal for protecting delicate items such as fruit and vegetables during transport.
- Easy to cut to size, suitable for a variety of sizes and shapes.

With Netfoam, you choose an efficient, adaptable and durable solution to ensure your products arrive at their destination undamaged.

# PROFILES ABOVE AND BEYOND

Available in various lengths, thicknesses and as corner profiles, our extruded PE profiles, **AbriProfile®**, provide ideal protection for your valuable products. Designed to protect against impacts and scratches, these profiles ensure that your products remain in perfect condition. AbriProfile® profiles offer versatile solutions tailored to your specific needs.

Our brand AbriProfile® Ocean Green® is made from 100% recycled material and 100% recyclable. Thanks to our BQA certificate, our customers are assured to have the most sustainable profiles on the market.

Our easily recognizable profiles, due the remarkable Ocean Green colour, have become a symbol for our commitment to both impeccable quality and a greener future.

## ADVANTAGES

- **Versatile protection:** Suitable for edges made of glass, wood, plastic or metal, for reliable protection against bumps and scratches.
- **Secure grip:** Grips securely around product edges, ideal for furniture, signs, radiators, door frames and even bicycle frames.
- **Customizable options:** Available in a variety of sizes and thicknesses, with the ability to customize profiles for specific needs.
- **Durable performance:** Made of high-quality PE foam for long-lasting protection.

## DID YOU KNOW...

Abriso Jiffy is also specialised in technical profiles. We understand that every project has unique requirements. The adaptability sets our technical profiles apart is.

That is why we offer a wide range of options, including different densities and sizes to fit your application.

Need a profile that can withstand severe impacts and scratches? Or do your underground pipes need to be protected from freezing temperatures?

Look no further. Our technical profiles, made from extruded polyethylene foam, offer exceptional resilience and insulating value and guarantee a long service life.

# ABRIPADS®

---

The **Abripads® Light-Adhesive** are perfect as a buffer between glass, natural stone, painted metal, wood, etc. and can be peeled off without leaving any residue after transport.

The **Abripads® Permanent Self-Adhesive** are very suitable as an inlay in cartons to secure electronic equipment (computers, servers, switchboards, TV sets, etc.) and heavy material against impact during transport.

## SPECIFICATIONS

In addition to the standard sizes and thicknesses, you can also request customised material in these qualities, up to 3500 x 1200 mm as the largest possible sheet size. As a standard sheet for processors, we can offer these qualities in 2000 x 1200 mm.

The standard pads are supplied on sheets with the following dimensions and numbers per sheet:

## CHOOSE YOUR OPTIONS

- **Sizes:** 50 x 50 mm, 75 x 75 mm, 100 x 100 mm
- **Heights:** 12 mm - 50 mm
- Light or permanent adhesive
- Per sheet or per box

## PROPERTIES

- Shock-resistant and absorbent
- Practical and easy to use thanks to its flexibility
- Light and economical
- Non-toxic
- Self adhesive

# DID YOU KNOW THAT...

You need 75% less raw material to protect the Mona Lisa with plastic corners compared to cardboard corners. When we compared the actual CO<sub>2</sub> footprint of cardboard alternatives to plastic corners, we concluded that we could protect 9 Mona Lisa paintings for the same CO<sub>2</sub> footprint of 1 Mona Lisa painting with cardboard corners.

So if you really care about the Mona Lisa and the environment you better use our Ocean Green® profiles.

# TECHNICAL FOAM SOLUTIONS ALWAYS A STEP AHEAD

Every design of a complex packaging solution starts with the choice of the right base material. With **Polylam®**, **Nopaplank®** and **Nopa Smart®** you always choose for an easy-to-convert, environmentally friendly material with superior protective properties.

Our wide range of non-crosslinked PE foam planks are a 100% recyclable alternative to crosslinked and PU foams.

## RENEW TECHNICAL FOAMS

All of our products are 100% recyclable and part of our sustainability story. Our Abriso Jiffy Renew range offers 80% recycled content. We achieve this by working with our partners and customers via collecting foam by-product created within their manufacture process.

### RE-USE

100% of our production by-product is re-used.

### REDUCE

Closed-loop processes reduce virgin material usage.

### RETHINK

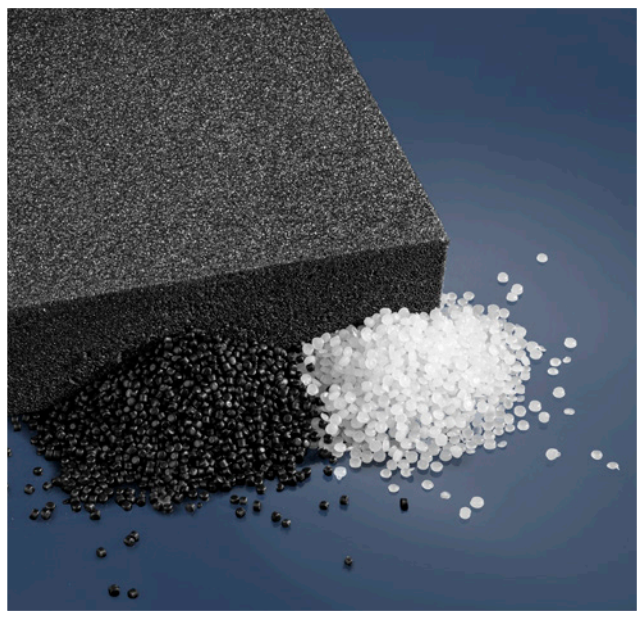

Developing new technologies to limit any environmental impact.

## GENERAL PROPERTIES

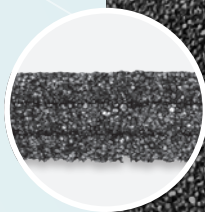

- 100% recyclable
- Cost Effective
- Lightweight
- Moisture-resistant
- CFC free
- Odour-free
- Does not contain heavy metals
- Easy to cut, saw, laminate, weld or mill

## FROM BASIC TO PREMIUM. WE HAVE A SOLUTION FOR EVERY NEED.

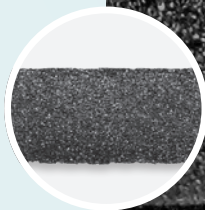

### POLYLAM®

Our most budget-friendly technical foam solution without compromising on quality. Polylam® is our multi-layered allround product with high flexibility in sizes & thicknesses.

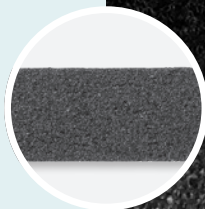

### NOPAPLANK®

When you want a little more in terms of look & feel and performance, choose our Nopaplank®. It is extruded in one piece, so you don't see layers like in Polylam®.

### NOPA SMART®

Our most premium option. With even better look and feel, more intense colours, softer surface and smaller foam cells. The fully recyclable Nopa Smart® is the perfect alternative to cross-linked foams.

COLD PACKAGING

# POLYLAM®

Polylam® is composed of laminated layers of non-cross-linked polyethylene (PE) foam. The closed cell structure provides excellent protection against shock and impact. Polylam® outperforms polystyrene in repeated drop tests. It can be simply converted into different shapes for easy processing into ready-to-use packaging.

## PROPERTIES

- Flexible sheet sizes and thicknesses.
- Provides shock absorption for both light and heavy products in short or long distribution cycles.
- Excellent creep performance over time.
- An environmental alternative for polyurethane and polystyrene.

## SPECIFICATIONS

- **Width:** 1200 mm
- **Length:** 2000 mm
- **Thickness:** from 20 mm to 100 mm
- **Density:** from 18 kg/m<sup>3</sup> to 100 kg/m<sup>3</sup>

### GO GREEN!

Polylam® is also available as RENEW:  
80% recycled content and 100 % recyclable.

# NOPAPLANK®

Nopaplank® is a single-layer, non-cross-linked, closed-cell polyethylene foam plank. It can be converted into numerous three-dimensional shock-absorbing products.

## PROPERTIES

- Most diverse die-cut foams on the market.
- Reusable.
- Extremely pressure resistant.
- Improved drop test performance and cushioning.
- Superior creep performance.

## SPECIFICATIONS

- **Width:** 600 mm
- **Length:** 2750 mm
- **Thickness:** from 50 mm to 100 mm
- **Density:** from 28 kg/m<sup>3</sup> to 100 kg/m<sup>3</sup>

### GO GREEN!

Nopaplank® is also available as RENEW:  
80% recycled content and 100 % recyclable.

# NOPAPLANK® XL

With the same outstanding performance as Nopaplank®, Nopaplank® XL is available in a larger sheet size of 1200 mm width, perfectly fitting a EUR-pallet and tailored to most converting machines.

## PROPERTIES

- Nopaplank® XL size of 100 mm x 1200 mm x 2000 mm or 2750 mm lengths is unique to Abriso Jiffy.
- Increased efficiency with sheet size produced to fit specific requirements.

## SPECIFICATIONS

- **Width:** 1200 mm
- **Length:** 2000 mm or 2750 mm
- **Thickness:** from 50 mm to 100 mm
- **Density:** 35 kg/m<sup>3</sup>

### GO GREEN!

Nopaplank® XL is also available as RENEW: 80% recycled content and 100 % recycable.

# NOPA SMART®

Nopa Smart® is characterised by its very smooth and fine cell structure. It is perfect for milling or cutting with a plotter. This cell structure provides a soft finish and guarantees perfect cutting lines and a stable final shape. This makes it perfect for presentation applications.

## PROPERTIES

- Most diverse die-cut foams on the market.
- Reusable.
- Fine cell structure gives soft feel.
- Space-saving packaging.
- An environmental alternative for cross-linked foam.

## SPECIFICATIONS

- **Width:** 600 mm or 1000 mm
- **Length:** 2750 mm
- **Thickness:** from 50 mm to 100 mm
- **Density:** 35 kg/m<sup>3</sup>

### SIZES (INSIDE / OUTSIDE)

- **Width:** from 180 mm / 200 mm to 230 mm / 250 mm
- **Height:** from 265 mm / 275 mm to 340 mm / 350 mm

### SPECIFICATIONS

- Strong and durable protective cushioning.
- Puncture, tear and pressure resistant.
- Available in 4 basic colours.

FSC® C120925  
Certificate

Strong protective  
cushioning

Fully customisable  
colour mailers

## FOAM MAILERS

### IDEAL FOR...

protecting delicate items like CDs/DVDs, lacquered products or electronic equipment.

### MATERIALS

- **Outside:** Kraftliner paper
- **Inside:** PE foam: 2 mm
- **Paper:** White Kraftliner: 137 g/m<sup>2</sup>
- **Foam thickness:** 2 mm

### SIZES (INSIDE / OUTSIDE)

- **Width:** from 100 mm / 120 mm to 350 mm / 370 mm
- **Height:** from 178 mm to 478 mm

### SPECIFICATIONS

- Foam sheets to protect surfaces.
- CFC-free foam.
- Reliably safeguards against damage by vibration.

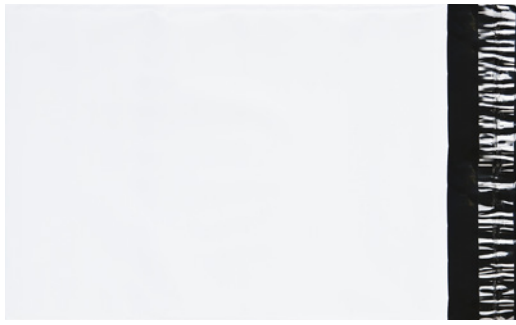

FSC® C120925  
Certificate

Foam sheets interior  
to protect surfaces

Reliable safeguard  
against vibration

## POLY MAILERS

### IDEAL FOR...

soft goods such as clothing, household items, accessories and even non-breakable items.

### MATERIALS

- **Outside:** Polyethylene (PE) film (white)
- **Inside:** Black
- **Film:** 50 micron
- The bag consists of 80% recycled post-consumer waste materials.

### SIZES (INSIDE / OUTSIDE)

- **Width:** from 190 mm to 590 mm
- **Height:** from 250 mm to 750 mm

### SPECIFICATIONS

- All-around protection and safety from the elements.
- Can be fully customised.
- Flexible application with good insulation.

Protection against moisture and water

Can be fully customised

80% PCR recycling LDPE

Protection against moisture and water

More resistant to perforation and tears

3-layer air bubble film interior

## POLY BUBBLE MAILERS

### IDEAL FOR...

products which need extra cushioning and shock protection.

### MATERIALS

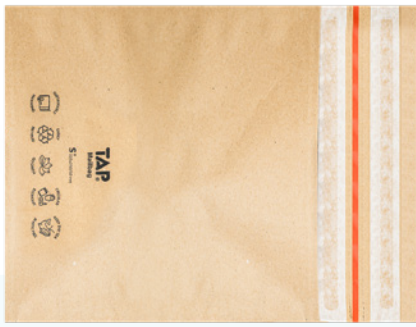

- **Outside:** Outer film with 50% reduced LDPE content
- **Inside:** Three-layer bubble film
- **Film:** White: 70 micron
- **Bubble thickness:** 44 micron
- **Bubble diameter / height:** 10 mm x 3,2 mm

### SIZES (INSIDE / OUTSIDE)

- **Width:** from 180 mm / 200 mm to 230 mm / 250 mm
- **Height:** from 265 mm / 275 mm to 340 mm / 350 mm

### SPECIFICATIONS

- 50% reduced LDPE content.
- 50% ingredients of natural source.
- More resistant to puncture, tear and pressure.

## PAPER BAGS

### IDEAL FOR...

items that are unlikely to be damaged in transit (clothing, small fabric accessories, soft toys, ...).

### MATERIALS

- **Outside:** extremely strong paper
- **Paper:** Brown: 80 - 100 g/m<sup>2</sup> (depends on size)

### SIZES

- **Width:** from 225 mm to 450 mm
- **Height:** from 250 mm to 500 mm

### SPECIFICATIONS

- Made from pure, virgin fibres for extra strength.
- Reusable - returning parcels to the sender.
- Double self-adhesive strip and tear strip for convenience.

FSC® C120925  
Certificate

Resealable  
and reusable

Biodegradable  
and recyclable

## JIFFY® PADDED BAGS

### IDEAL FOR...

posting heavy or bulky goods in safe conditions.

### MATERIALS

- **Outside:** 100% recycled and biodegradable quality Kraft paper
- **Inside:** Macerated paper
- **Paper:** Brown: 90 g/m<sup>2</sup>

### SIZES (INSIDE / OUTSIDE)

- **Width:** from 105 mm / 120 mm to 326 mm / 356 mm
- **Height:** from 229 mm to 483 mm

### SPECIFICATIONS

- Long-lasting protection to provide cushioning for items.
- Absorbs possible grease off mechanical parts in transit.
- 'Shake and fluff' system to reinvigorate the fibre lining and keep protecting.

FSC® C120925  
Certificate

Perfect for heavy  
or bulky goods

Shake and fluff  
system for re-use

## RETURN TO NATURE

It is not just the ability to protect your precious items what makes the **TAP Comebag®** truly remarkable, it is also its dedication to sustainability.

Recycling the TAP Comebag® is easy. The eco-friendly paper goes in the paper bin. And the 80% post-consumer bubble goes in the PMP bin.

By choosing our eco-friendly envelopes you also make a positive impact on our planet. In cooperation with Posadzimy.pl, we have prepared a cyclical tree planting campaign.

Join us in the important journey towards a greener future!

# COLD PACKAGING KEEP COOL, RECYCLE EASY

## NICECUBE

NiceCube is a high-performing, fully recyclable insulated packaging system. This system is made out of two 100% recyclable paper pads with 100% recycled macerated paper filling inside. The pads can be recycled by easily throwing in the paper recycling bin at home.

## BENEFITS

- 100% recyclable within household recycling
- 100% recycled macerated paper filling
- Excellent thermal properties
- Excellent impact protection
- Budget friendly

## THERMAL BAGS & SLEEVES

Thermal PE and PP bags and sleeves are perfect for keeping food at the right temperature, whether hot or cold. Commonly used by services like Deliveroo, these bags ensure that meals arrive fresh and at the desired temperature. They are also ideal for industries like aviation, where maintaining the temperature of in-flight meals is essential. Lightweight, durable, and reusable, these thermal bags are an excellent solution for any situation where temperature control is crucial.

# AUTOMOTIVE COMPONENTS IMPROVING AND PROTECTING

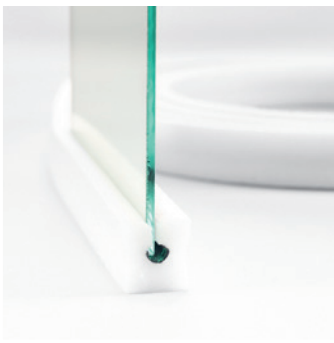

With our extensive experience and broad offering of high-quality solutions in PE and PP, Abriso Jiffy is the ideal partner for the automotive industry.

PE Foam is perfect for protecting car parts against scratches and impact damage, not only during transport but also in the production process. AstroFoam® sheets, AstroFoam® bags, AbriProfiles® and AbriProfipads® are our most common products used for automotive packaging. Nopaplank®, Nopa Smart® and Polylam®, on the other hand, are commonly used to ship delicate carparts safely.

Our Polypropylene foam PROP-X® is also used as inner lining and dividers for materials shipped in wooden boxes, as substitute for cardboard. The advantage of PROP-X® is that it is water-repelling and does not need to be laminated with composite materials to become scratch-resistant (so it remains 100% recyclable).

Beyond packaging, our Polypropylene foam, PROP-X® also plays an important role in the automotive industry by providing lightweight, soundproof, heat-resistant and water-resistant solutions. These materials address the limitations of traditional parts and offer durability and comfort while meeting stringent automotive standards.

Applications include door water shields, twin sheet air ducts and acoustic absorbers.

# ELECTRONICS TURN UP YOUR LIGHT

Our efficient antistatic PE AstroFoam® and AstroBubble® are designed to protect delicate electrical components during storage, transport and assembly.

These specialised materials are carefully designed to prevent electrostatic discharge, allowing delicate electrical components to be safely packed.

Antistatic AstroFoam® is ideal for cushioning and protecting delicate components during transport, assembly or storage, while antistatic AstroBubble® provides superior shock absorption and surface protection.

# FURNITURE & MOVING IT'S A WRAP!

AstroBubble®, AstroFoam® and AbriProfiles® are essential for moving and protecting furniture and other fragile and breakable items. Due to their air barrier, they are the perfect protection against shocks and prevent scratches and dents.

These protective materials ensure that your valuables arrive at their new destination in perfect condition, making your move worry-free.

Our extensive product range offers a wide range of protective solutions, including laminated bubble for even better surface protection (e.g. non woven PP, kraft paper, foam).

# SPORT & LEISURE WHEN INDUSTRY MEETS ADVENTURE

If you want to enjoy the open road on your bike, it is of utmost importance that both rider and bike are in top condition. Our AbriProfile® Ocean Green® offers the ultimate solution for protecting your bike during storage or transport. Designed with reliable shock and scratch protection, our profiles offer peace of mind.

With flexible PE foam in varying shapes and sizes, our profiles fit all bike shapes precisely, ensuring optimal surface contact and minimizing the risk of damage.

Our profiles are ultra-light and flexible, which improves product handling and makes them ideal all kinds of curved shapes. An added benefit is the water-repellent property, protecting your bike from damp conditions.

Whether you, as a manufacturer, transport bikes across the country or, as an enthusiast, simply transport them between adventures, our profiles are designed to meet your needs with precision and care.

## MORE LIKE A SWIMMER?

Our swimming noodles offer fun and safety in the water.

Made from high-quality PE-foam, these Abriso Jiffy tubes are lightweight yet robust, providing excellent support for swimmers of all ages. They are perfect for swimming lessons, pool parties, or simply relaxing in the sun.

What sets them apart is their versatility and durability. Resistant to water and designed for maximum comfort, they offer a superior swimming experience while promoting safety and fun. Whether you're teaching your kids to swim or enjoying a leisurely float, Abriso Jiffy swimming noodles deliver the reliability and enjoyment you need for hours of aquatic enjoyment. Dive into a new level of swimming experience with Abriso Jiffy - where safety meets fun in the water!

# E-COMMERCE MORE THAN JUST A DELIVERY

In e-commerce, optimizing packaging is key: lighter, properly sized materials minimize waste and save transport space, while ensuring the safe and secure delivery of goods. Our recyclable E-commerce solutions take care of all these challenges.

With our E-bubble you chose for an extra low bubble height, herewith saving space in transport. Our high-performing TAP or JIFFY mailers and our AstroBubble® bags are replacing unnecessary big boxes and void fill.

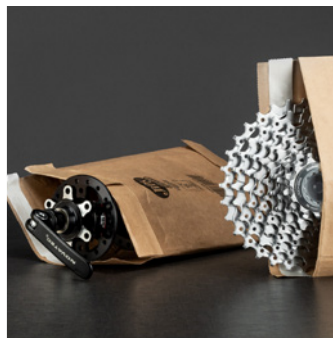

Did you know that our bubble envelopes can be customised with your unique designs?

# GUARDIANS OF QUALITY

---

Our state-of-the-art manufacturing and advanced machinery allow us to produce high-quality products quickly, reducing production time without sacrificing quality. We have streamlined workflows from raw material procurement to final delivery, minimizing unnecessary steps and ensuring fast results.

Our expert team's extensive industry knowledge and efficient collaboration ensure careful and accurate execution. We quickly adapt solutions by understanding and responding to unique customer needs, thanks to our focus on research and development that maximizes productivity and minimizes waste.

We embrace an agile mindset, quickly adapting to market demands and closely following emerging trends. Our investment in modern infrastructure enables us to meet high demands efficiently and reliably.

# CUSTOMISE FOR YOU

---

At Abriso Jiffy, customer focus drives our approach. We understand the unique requirements of each customer and go beyond standard offerings to meet his needs.

Our process begins with consultations to understand specific challenges, goals and industry dynamics. Armed with these insights, our experts develop customized solutions.

Whether it's protective packaging, insulation or other specialized needs, we develop customized products while considering dimensions, materials, sustainability and specific applications. This ensures seamless integration and a competitive advantage for our customers.

With decades of experience, our team anticipates challenges and opportunities and provides proactive, industry-specific solutions. Customization is never at the expense of quality; we hold to strict quality assurance processes to ensure high performance, durability and reliability.

## TAILOR MADE PACKAGING SOLUTIONS

# WE CAN MAKE IT FOR YOU!

---

Want more? No problem. As a leading manufacturer, Abriso Jiffy can meet all customer needs. From larger or smaller side strips, to your own brand colour, or company name on our products, we can make your request a reality.

Under the motto "We can make it for you!", we're proud to show our flexibility.
