

Compliance Declaration

Manufacturer: Abriso-Jiffy NV

Headquarter Address: Gijzelbrechtegemstraat 8-10, 8570 Anzegem, Belgium

VAT Number: BE 0426.860.673

(Note: A complete register of all group production facilities covered under our unified quality management network is provided in Annex I)

Scope of the Declaration

This declaration applies universally to our complete portfolio of PE-, PS and PP-based protective packaging solutions supplied to the customer, spanning both mono-material and laminated material structures. This includes, but is not limited to:

- PE Foam Products (Rolls, Sheets, Bags, Other Conversion)
- PE Bubble Products (Rolls, Sheets, Bags, Other Conversion)
- PE Profiles (Longitudinal, Corners)
- PE Technical Foam Solutions (Polylam, Nopaplank, Nopasmart, Die Cuts)
- Mailers & Padded Bags
- PP Protect
- XPS

Current Compliance Baseline (Effective August 12, 2026)

In strict alignment with Regulation (EU) 2025/40 on packaging and packaging waste (PPWR), which entered into force on February 11, 2025, and applies generally from August 12, 2026, Abriso-Jiffy NV hereby certifies that all packaging products comply with the phase-one sustainability requirements:

- **Restriction of Hazardous Substances (Article 5):** The sum of concentration levels of heavy metals—specifically Lead (Pb), Cadmium (Cd), Mercury (Hg), and Hexavalent Chromium (Cr VI)—introduced via raw materials, masterbatches, or additives does not exceed 100 mg/kg (100 ppm) by weight, fulfilling the requirements of Article 5(4).
- **PFAS Prohibition:** In accordance with Article 5(5), the products contain no intentionally added per- and polyfluoroalkyl substances (PFAS).
- **REACH Integration:** The materials fully satisfy EU Regulation (EC) No 1907/2006 (REACH). They do not contain any Substances of Very High Concern (SVHC) on the current Candidate List in concentrations exceeding 0.1% w/w.

Independent, third-party verified laboratory testing reports validating these chemical assertions are held at our corporate headquarters. Equivalent material compliance across all manufacturing sites is strictly maintained via unified recipe controls, standardized resin procurement, and internal risk-analysis protocols.

Forward-Looking Compliance (Post-2026 Timeline)

Abriso-Jiffy NV is actively engineering its long-term roadmap to ensure an unbroken supply chain as subsequent waves of Regulation (EU) 2025/40 take effect. Amongst which:

- **Design for Recyclability (Article 6 - Effective January 1, 2030):** While the final secondary calculation rules and precise testing methodologies are currently being developed by the European Commission, we confidently anticipate that our standard mono-materials will effortlessly secure elite compliance. For our high-performance laminated and multi-layer structures, we are actively conducting structural evaluations. Should any specialty laminate fall below Recyclability Grade C, we are committed to co-developing fully compliant alternative solutions well ahead of the 2030 market deadline.
- **Post-Consumer Recycled (PCR) Content (Article 9 - Effective January 1, 2030):** The mandatory 35% PCR minimum target for plastic transport packaging becomes effective in 2030. To ensure a seamless transition, our R&D and engineering teams are actively testing PCR streams. Our main focus is evaluating how these specific streams perform to ensure they do not compromise final product quality. Concurrently, we are adapting our machine capabilities to master the processing of these recycled inputs. We are committed to delivering fully compliant, certified solutions ahead of the deadline that maintain the exact same cushioning, tensile strength, and protective integrity you rely on to secure your goods.

Legal Affirmation & Authorization

This Declaration is issued under the sole responsibility of the manufacturer. We maintain the required technical documentation (per PPWR Annex VII) and make it available to competent authorities upon reasoned request.
